PG&E Letter DCL-13-034

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555-0001

Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Expected Submittal Date for Licensee Event Report 1-2012-005 Supplement

Reference: PG&E Letter DCL-12-082, "Licensee Event Report 1-2012-005-00,
Unanalyzed Condition due to Nonconservative Change in
Atmospheric Dispersion Factor," dated August 31, 2012.

Dear Commissioners and Staff:

In the above reference, Pacific Gas and Electric (PG&E) Company submitted a Licensee Event Report (LER) to the U.S. Nuclear Regulatory Commission (NRC) related to an unanalyzed condition involving a nonconservative change in atmospheric dispersion factor. In this LER, PG&E indicated that it would provide a supplemental report to explain the safety consequences of this event by April 1, 2013, following the completion of a safety consequences assessment.

Additionally, Reference 1 mentioned that PG&E would withdraw Event Notification 48246, identified on August 28, 2012, or submit a separate LER to the NRC for the issue based on the outcome of the investigation.

PG&E has not yet finished its safety consequences assessment. Based on the current plan for completion, PG&E will submit the LER supplement by June 3, 2013.

PG&E makes no new or revised regulatory commitments (as defined by NEI 99-04) in this letter.

Sincerely,

Barry S. Allen
